## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).
2. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).
3. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).
4. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,647,347 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent and the application are claiming common subject matter as follows:

Art Unit: 2883

5. Both the application and the patent disclose a data acquisition system and method and a time-of-flight mass spectrometer comprising an accumulator having two or more parallel accumulation paths and configured to accumulate corresponding data samples across a transient sequence through at least two different accumulation paths to provide a summation of said data samples of said different paths.

6. Claims 1-10 of the Application correspond to claims 1-9 of the patent; claims 11-13 correspond to claims 10-14 of the patent; and claims 14-20 correspond to claims 15-20.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,712,480 discloses a time-of-flight data accumulation system.
